

Outdoor Furniture

ICI produces many outdoor benches and tables constructed with a durable recycled plastic lumber that is finished with a great lumber look. This plastic is recycled from milk jugs diverted from landfills. The use of plastic is not only environmentally friendly, it won't rot, split, or crack, and does not need to be replaced after time, as does wood. Also, plastic is non-toxic to the environment, unlike some other materials.

Powder Coat Paint

ICI utilizes Powder Coat Paint to finish its metal outdoor furniture. This environmentally preferred method of painting is weather resistant and allows for a very attractive finish. More importantly powder coat painting is far more sensitive to the environment than other forms of painting. Ask about available color options.

EXPANDED METAL OUTDOOR FURNITURE
